MADANAPALLE INSTITUTE OF TECHNOLOGY & SCIENCE (UGC - AUTONOMOUS)

Report on **"Entrepreneurship & Self Development"** Organized by Entrepreneurship Development Cell & IIIC - MITS **19 September 2017**

Mr. Siva G Reddy addressing the participants on the importance of Entrepreneurship and Self Development

Submitted by: Dr. R. Vara Prasad, Asst. Prof, Department of Management Studies & Coordinator, ED Cell.

Entrepreneurship Development program titled "Entrepreneurship & Self Development" was organized on 19-09-2017 for Final B.Tech (ECE/CSE) & MBA Students.

Dr. Ch. Rama Prasada Rao, Dean-IIIC in his inaugural address said, 'The institution is providing all the essential resources to pursue entrepreneurial dream. Students should make use of every opportunity that comes their way to build their dream companies.' He insisted on the need to attend this kind of seminars to learn from the experiences of resources persons. In his speech Dr. Rao said that Indian economy's development depends on the new generation enterprises. So, students should learn new business opportunities available in the areas of Analytics, Cloud Computing and Internet of Things (IoT).

Dr. R. Vara Prasad, Asst. Prof and Coordinator ED Cell introduced Mr. Siva G Reddy to the audience.

Mr. Siva G Reddy in his opening remarks said that the students should make use of resources to the fullest and enjoy the entrepreneurial journey. Speaking about Self Development Mr. Reddy said that it is an excursion that any individual who needs to exceed expectations in life must take. It doesn't make a difference in what range you need to exceed expectations and advance, regardless of whether it be in business, work, examinations, marriage or deep sense of being. He added, 'All

aspects of our lives can just genuinely enhance on the off chance that we assume liability for their change. The best area of such change that will affect every single other part of our lives, is enhancing ourselves. This can be at a few levels: Enhancing your KNOWLEDGE; Enhancing your SKILLS'.

Speaking about Entrepreneurship, Mr. Reddy said, 'First, dream and set the objective. There is a quote that says, think ambitiously and continue thinking ambitiously. Bill Gates, the founder of Microsoft envisioned that one-day individuals would have their very own PC. People chuckled at him and his fantasy is currently a reality. If we dare to dream, we can turn the fantasy to a reality through diligent work and assurance. Second, Consistent. We should help ourselves out by making a move at this moment, don't sit tight for the correct minute, such does not exist. If we don't do our part of working on our goals every day, then surely nothing will be accomplished. We can begin maintaining a business while being a youngster. Business openings accessible all over. We can begin from our own particular pastimes, for example, cooking, outlining garments, and then some. Try not to be humiliated in offering things. A domestic venture can form into a substantial organization if it's very much overseen. Thirdly, be innovative. Seed capital dependably be the primary issue in maintaining a business. It doesn't make a difference if our seed capital is not sufficiently much, yet it relies on our imagination. With innovation, a disaster area can be ended up being a profitable thing. Moreover, amiable and outgoing individual identity is on a very basic level required in maintaining a business. We should be friendly to construct a participation with different organizations - the notable organizations as well as the obscure organizations. An outgoing individual will effortlessly find the opportunity to fabricate shared association with others. The latter is to be quiet. Numerous youthful business visionaries bomb in the main term of a business since they can't deal with the hazardous hindrance. They end up noticeably disappointed and crushed because of unsuitable business result, for example, low benefit, capital lack and then some. The best way to cure it is to be understanding and idealistic. We should have an outlook that initial term of a business can be unrewarding, yet there must be a period to earn back the original investment point and then benefit. To wrap things up, we should remember that being a businessperson doesn't interfere with our obligation as under studies. But it is clear from this that even improving your skills first requires improving your knowledge. Therefore, we can conclude that all self-improvement begins with self-growth in the area of our knowledge.

'In any case, it is clear from this that enhancing your abilities initially requires enhancing your insight. In this manner we can reason that all self-change starts with self-development in the territory of our insight.'

The program received an overwhelmed response with the participation of 106 students. Entrepreneurship Development Cell extends sincere gratitude to the Management, Principal, and Head of the Departments for their support.
