### 1. Nagarjuna Thotamsetty's Topics:

1. How to crack the Technical and HR rounds
2. Importance of Emerging technologies and how it will help in the career
3. How to earn money from student life itself by Application Development
4. How to be unique in Competitive World.
5. How to prepare a resume

### 2. Hemalatha Naidu's Topics:

Ms. Naidu's session was about Big data / Hadoop. Big data is one of the high demanded area in IT, so everyone wants to learn Hadoop. She gathered difficulties from students for adapting new technologies. It's often hard to learn a new technology because a lot of the terminology, concepts and architecture approaches are new. Books, white papers, blogs usually try to teach Hadoop from a perspective of already knowing it. These resources use terms, concepts and context that a newbie does not understand. Therefore, it is very hard to learn a completely new subject. She gave some tips how to learn with new technology of Big data/Hadoop with the existing resources on our own.

### 3. Rithvik Podduturi's Topics: -

Mr. Rithvik discussed the importance of IoT. He gave introduction to devices like Amazon Echo(Alexa) and Hexiwear. He also included real-time project example of how IoT can be used to make a college campus a smart place along with other technologies like Web, Mobile app, and Big Data. Career perspectives of IoT was also touched upon.
